Application Development Associate, Accenture Solutions Pvt Ltd, India **Nov 2016 - Jan 2018**

- Responsible for implementing new features and resolving the critical defects.
- Trained new joiners on SAP UI5 and Contract Lifecycle Management (CLM).
- Developed incident report generation tool using ServiceNow Web Services and Apache POI library, which reduced manual work, less errors and 80% less time in generating report.
- Automated the Workflow cancellation process in SAP eSourcing which resulted in 80% time saving.
- Tools/Technologies:** Java, Javascript, SAP Fiori/UI5, SAP eSourcing, ServiceNow

Project Trainee, Sterlite-Tech, Ahmedabad, India **Feb 2016 - Oct 2016**

- Was involved in development of Payment Management module in Telecom Billing Product (Crestel BSS)
- Responsible for implementing new features and resolving the critical defects.
- Developed a 3rd Party API Testing tool for QA team using Java Reflection API and Apache POI Library, which resulted in more efficient testing and 50% improvement in time for testing.
- Tools/Technologies:** Java, EJB, Hibernate, Drools, JBOSS, ZK(Zul), Oracle, SVN, Jira

VOLUNTEER EXPERIENCE

Learning and Development Leader, Google Students Club LDCE **June 2013 – May 2015**

- Learn about innovative Google products and programs and plan and host events on campus.
- Act as a campus contact for Google teams and help Google better understand college culture.

TECHNICAL SKILLS

LANGUAGES	: Java, Javascript
WEB TECHNOLOGIES	: NodeJS, ReactJs, Redux, Ajax, HTML5, CSS, JQuery,
FRAMEWORKS	: Spring, Spring Boot, Hibernate, Express, Junit, Mocha, EJB, ZK, Open UI5 (SAP UI5)
DATABASES	: MySQL, MongoDB, Redis
CLOUD	: AWS, Google Cloud Platform
TOOLS, IDE, Servers	: Eclipse, IntelliJ, Visual Studio, Android Studio, Tomcat, JMeter, Git, SVN, Apache Kafka
OTHER TECHNOLOGIES	: Docker, Kubernetes

ACADEMIC PROJECTS

Movie Ticketing Portal (Replica of Fandango) **April 2018 – June 2018**

Responsible for project analysis, design, development, unit testing and deployment.

- Developed a distributed application which provides all features of fandango, using MERN stack.
- User can book/cancel a ticket, view transaction history, get movie details, post review.
- Admin can Add/Update/Delete movie, multiplex and show timings along with analytics dashboard.

Technologies: React.Js, Node.Js, Express, Passport.Js, Apache Kafka, MongoDB, MySQL, Redis, Mocha, JMeter.

Crowdsourcing Marketplace (Replica of Freelancer) **Feb 2018 - May 2018**

Responsible for project analysis, design, development, unit testing and deployment.

- A distributed application which encompasses features of freelancer, developed on MERN stack along with Apache Kafka as messaging system, PassportJs as authentication middleware.
- Using this, an authenticated user can View/Post projects, place bid, hire freelancer.

Technologies: React.Js, Node.Js, Express, Passport.Js, Apache Kafka, MongoDB, MySQL, Mocha, JMeter.

DishClose **April 2018 – June 2018**

Responsible for project analysis, design, development, unit testing and deployment.

- Developed a smart android application in which a user can scan the food dish and the application will recognize the dish.
- User can tap on screen to fetch the ingredients and recipe of dish recognized and can provide feedback on result.

Technologies: Android, NodeJS, MongoDB, Microsoft Custom Vision, Food2Fork, Mshape

Network Manager **B.E Final Year Project**

Responsible for project analysis, design, development, migration, unit testing and deployment.

- Network Manager is an android based app to monitor and manage your networks. By using this app you can find out which devices are connected to your Wi-Fi network, in just a few seconds.

Technologies: Android Development Tools, Java

Washiz **Sept 2015 - Oct 2015**

Responsible for project analysis, design, development and unit testing.

- Washiz is a web portal which provides users with the luxury of not having to do the laundry themselves.
- With this web portal, users can place the order, choose the pick-up and delivery times and they get clean clothes.

Technologies : Java, JSP, Servlets, JDBC, MySQL, HTML, CSS, JavaScript.

Code Square **Jan 2015 - June 2015**

Responsible for front end and database development of website.

- Code Square is an online coding platform where programmers at any corner of the world can participate and compete.

Technologies: Java, JSP, Servlet, Hibernate, Oracle, Bootstrap.
